EDUCATION

The University of Alabama Tuscaloosa, AL
Bachelor of Science in Computer Science August 2017—May 2021
Minor: Randall Research Scholars Program (Undergraduate Research)
GPA: 3.94/4.00
Coursework: Data Structures & Algorithms, Software Engineering & Design, Operating Systems, Databases, Honors Multivariable Calculus, Linear Algebra, Theory of Probability, Statistical Data Analysis, Coursera Machine Learning and Deep Learning Specialization

SKILLS

Programming Languages: Python, SQL, C#, C++, C, Java, JavaScript, MATLAB, Fortran
Libraries/Frameworks: TensorFlow, PyTorch, Keras, fastai, Scikit-Learn, Pandas, NumPy
Tools/Technologies: Git, Docker, Amazon Web Services, Google Cloud, Windows Server, Hyper-V Manager

EXPERIENCE

Google Sunnyvale, CA
Software Engineering Intern May 2019—August 2019
- Reduced resource consumption for Greentea (Google's CRM) by 15% per month saving billions of processor seconds per year
- Utilized modern C++ to implement a new cache recommendation system; Used Python and SQL to analyze and visualize data
- Managed project through entire lifecycle including requirements research, design docs, presentations, unit tests, and code reviews

Alabama Transportation Institute Tuscaloosa, AL
Research Assistant May 2018—present
- Open-sourced a Google Maps web application used by 30+ engineers and researchers in the Alabama Transportation Institute
- Modernized previous work in vehicle crash recognition by utilizing YOLOv3 and reproducing Caffe2 models in TensorFlow
- Published 3 scientific papers within a year; presented papers at international research conference in Las Vegas, NV

Randall Research Scholars Program Tuscaloosa, AL
Lab Manager January 2018—present
- Administer 3 Linux servers and 6,000+ user accounts in the only student-run computer lab at the University of Alabama
- Manage 7 servers, 40+ virtual machines, and 30+ computers using Windows Server, Active Directory, and Hyper-V
- Act as a liaison between faculty and students and represent the Randall Research Scholars Program at recruiting events

Bentley Systems Huntsville, AL
Software Engineering Intern May 2017—August 2017
- Used C++ and SQL to develop AssetWise ASIM asset information storage feature and Google Test framework to create unit tests
- Created a logical testing and reporting strategy on Team Foundation Server to log new software defects and improve tester efficiency
- Adopted Agile methodologies to collaborate with a Senior Software Engineer and 2 other interns for a summer-long software project

AWARDS & HONORS

- Bayham Family Endowed Scholarship for Academic Achievement, Leadership, and Personal Integrity
- 1st place: Engineering, Transportation, & Energy, UA Undergraduate Research & Creative Activity Conference
- 1st place: Computer Science, MIS, Cybersecurity, & Statistics, UA Undergraduate Research & Creative Activity Conference
- Darren Evans-Young Most Outstanding Randall Research Scholars Program Freshman
